BRAND PROTECTIVE PACKAGING

## Foam-In-Place Packaging System

Instapak® 901/900

Compact, Reliable And Simple To Use

The SEALED AIR® brand Instapak® 901/900 series system is the emblematic system of the Instapak® family. With the backing of SEE's service and packaging design technicians, the system provides consistent custom, engineered foam-in-place protection time after time.

### DAMAGE PROTECTION

Each package is a custom-fit foam solution, and our family of foam options can provide extra rigidity or lower density as you require.

### REDUCE CUBE SIZE

An Instapak® foam-in-place package provides just the right amount of packaging. High performance Instapak® foams allow you to reduce package size and weight without sacrificing protection.

### INCREASE VELOCITY BY REDUCING DOWNTIME

The all-electric system installs in minutes. No scheduled maintenance is required. Electric metering pumps and self-diagnostic controls guarantee top quality Instapak® foam.

### PACKAGING EXPERIENCE

A custom Instapak® foam-in-place package produces specifically designed cushions for ultimate protection and efficiency.

### FLEXIBLE OPTIONS

The system can be adjusted to dispense foam at the ideal rate for your application. Swivel fittings allow easy and flexible foam dispensing. The Instapak® 901/900 foam output rate is 2 to 4 kg/minute.

### THE RIGHT SYSTEM FOR YOU

The system uses 210 and 60 litre drums of Instapak® liquid foam, and is designed for a variety of small, medium or large on-demand packaging operations.

## Foam-In-Place Packaging System

### UTILITY REQUIREMENTS

**Electrical**  
380 / 400 VAC, 3 phase, N,  
GND 16A, 50 / 60 Hz

**Receptacle Type:**  
CEE 17 (5-pole, 16 A)

For important operating and safety information, please see the "Recommendations for the Safe Use and Handling of Instapak® Foam-in-Place Components" guide.

## TYPICAL APPLICATIONS

The SEALED AIR® brand Instapak® 901/900 series system is suitable for packing a wide range of products such as motors, valves, glass or ceramic products, measuring instruments, insulation of refrigerant systems.

Automotive

Industrial Component

Electronic

Temperature-Sensitive Goods

Medical Equipment

General Manufacturing

Home Goods

Aerospace

## SUSTAINABILITY

- Instapak® foam expands on-demand and on-site freeing up valuable warehouse space and reducing the number of delivery trucks with associated costs and emissions
- A custom-shaped cushion is created within the carton, that absorbs bumps and bruises during the entire shipping process which highly reduces shipping damage and the consequent need to ship replacement products
- The foam provides the right amount of packaging material to protect the product which optimises transportation with smaller cartons
- Instapak® cushions can be reused as carton fillers or reshaped manually to fit the next product shipped
