BRAND PROTECTIVE PACKAGING

## QuikWrap M

Manual paper wrapping dispenser

Small and easy to use paper wrapping system

This manual wrapping application offers tear and hold technology, using fully recyclable\* honeycomb paper and interleaf tissue paper for a premium wrapping experience. The system provides light cushioning in low to medium volume wrapping applications.

### PERFECT SIZE

The system is work-cell sized, designed for easy integration on a pack table.

### EASE OF USE

The manual system is designed to be easy to set up, with no electricity or maintenance required. The QuikWrap M offers light cushioning/wrapping support to customers packaging fragile goods. The strong protection value is coupled with 100% fully recyclable honeycomb paper and interleaf tissue for premium wrapping of your products to provide light cushioning.

### OPTIMAL DESIGN

The tear and hold technology holds the paper in place, making it easy to tear without the need for scissors, and ensures the paper is ready for the next package, without re-feeding the paper.

\*Degree of recyclability of the final package depends on the specific product configuration or components intended for recycling and the scope and availability of appropriate local recycling facilities.
